Dear Dr. Southerland:

I write to respectfully ask the EPA to reject the state of Wyoming's August 20th "Categorical Re-designation of Streams from Primary Contact Recreation to Secondary Contact Recreation."

Please communicate to the state of Wyoming that a successful rule will be one that incorporates feedback from a diversity of recreational users, and one that is much more targeted and limited in terms of the streams that will be "downgraded."

My family, friends and I regularly recreate on and in low flow streams more than a mile from towns and more than a half-mile from developed campgrounds and trailheads. Whether it's dunking in a stream in the Wind River Mountains after a long, hot day of climbing or netting a fish caught by a friend in the Bighorn Mountains, the cleanliness of these waters is something we value.

Sincerely,

Lynn Heeren
